KRISHNA BHARAMBE

IAM & AUTOMATION ENGINEER

Pune, Maharashtra, India | +91 9011365788 | krishnabharambe@gmail.com | linkedin.com/in/krishnabharambe

PROFESSIONAL SUMMARY

IAM & Automation Engineer with 7+ years of experience in Identity Governance, IAM application onboarding, access governance, PAM, and IAM automation across enterprise environments. Hands-on experience with RSA IGL (Aveksa), .NET/C#, Python, REST/SOAP integrations, AWS and Azure. Experienced in designing application onboarding, identity/account/entitlement collectors, SOD controls, access certification, privileged-access governance, audit reporting, and automation solutions that improve operational efficiency and control compliance.

CORE SKILLS

IAM / IGA: Identity Governance, Application Onboarding, Access Governance, Access Certification, Entitlement Management, SOD, Provisioning/Deprovisioning, Orphan Accounts, Non-Human Accounts, PAM

IAM Platforms: RSA IGL (Aveksa), CA PAM, ACAT

Automation & Development: .NET, C#, Python, Django, PDI, REST APIs, SOAP APIs, Postman

Cloud & Data: AWS IAM/Identity Center, Azure, Oracle SQL, MS SQL, MySQL, PostgreSQL

Operations: ServiceNow, Jira, Production Support, Troubleshooting, Audit & Compliance, SOPs

PROFESSIONAL EXPERIENCE

Tata Consultancy Services | Cyber Security Analyst Feb 2020 – Present

IAM Engineering & Application Onboarding

- Led end-to-end IAM application onboarding in RSA IGL (Aveksa), including account, entitlement and identity collectors, connection parameters, import validation and production deployment.
- Designed directory creation and access mappings for newly onboarded applications, ensuring accurate identity, account, entitlement and access-group relationships.
- **Managed and pulled access-related data from INFRA sources including Unix, Windows, Oracle, MySQL, PostgreSQL, Snowflake and other enterprise platforms to support IAM onboarding, access governance and certification activities.**
- Conducted onboarding assessments to determine centralized request, approval and provisioning requirements in line with Information Security policies.
- Gathered requirements from application owners, Information Security teams and engineering stakeholders covering application architecture, user roles, access models and provisioning approach.

IAM Governance, PAM & Compliance

- Designed and enforced SOD rules and account policies to support regulatory and audit requirements.
- Supported access certification campaigns, CA PAM recertifications, access revocations and remediation of orphan accounts.
- Performed CA PAM requirement analysis and supported privileged-access control and compliance activities.
- Implemented non-human account vaulting and supported password-rotation and vaulting enforcement.
- Created operational, audit and compliance reports for IAM governance, PAM monitoring and internal audits.
- Maintained SOPs and presented onboarding status, control findings and risk summaries to stakeholders and senior management.

IAM Automation & Engineering

- Developed and maintained .NET/C# modules to extend IAM automation capabilities and enhance ACAT functionality.
- Integrated .NET services with ACAT backend components to streamline data ingestion and improve PDI-based processing.
- Implemented C# logic for account vaulting, password-rotation and SOD enforcement.
- Built .NET utilities for audit reporting and collector validation and optimized components interacting with ACAT and Aveksa.
- Developed collectors for AWS and Azure to retrieve access-related data for IAM governance and certification activities.
- Built collectors and integrations for REST APIs, SOAP APIs, Oracle, MS SQL, MySQL, PostgreSQL, CSV and Excel sources.

Production Support & Operations

- Troubleshot Aveksa and ACAT PDI scripts, failed collectors and circuit-breaker issues.
- Performed database and tool-performance validation and quality checks for applications in development.
- Supported production onboarding, MRA-related activities, account compliance checks and ongoing IAM operations.

Dpark Software Solutions | Full Stack Developer Jun 2018 – Dec 2019

- Developed REST APIs using Django REST Framework and tested APIs using Postman.
- Created and executed Agile test scripts and collaborated with clients and engineering teams to solve business problems.

• Worked with distributed systems, web infrastructure and network protocols.

EDUCATION

B.E. – Information Technology | 8.10 CGPA | 2014–2018
Maharashtra State Board: 12th – 70% | 10th – 76%

SELECTED TECHNICAL AREAS

IAM Engineering: IGA • IAM Application Onboarding • Access Governance • Access Certification • SOD • PAM • IAM Automation • Collectors • API Integrations • Audit & Compliance

Development: C# • .NET • Python • Django • PDI • REST • SOAP • SQL

Cloud: AWS • Azure

Tools: RSA IGL (Aveksa) • CA PAM • ACAT • ServiceNow • Jira • Postman
